

Ring sizer

Print on A4 at 100% (Actual size). Turn off 'Fit to page'.

1 Check the print first

50 mm: measure this line

Don't use the sizer until the line measures exactly 50 mm on a ruler and a bank card covers the box exactly. If either is off, your printer scaled the page: print again at 100% (Actual size).

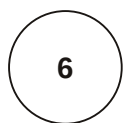

Printing from a phone? Phones often shrink the page. If the check fails, print from a computer, or measure a ring or a paper strip with a ruler instead (qilver.in/pages/ring-size-guide).

A bank card should cover this box exactly

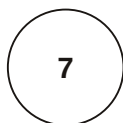

85.60 × 53.98 mm (standard card size)

2 Find your size with a ring you own

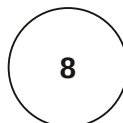

Place a ring you own on the circles: your size is the circle that exactly fills the inside of the ring.

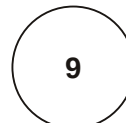

d = 14.9 mm

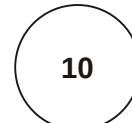

d = 15.3 mm

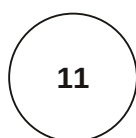

d = 15.7 mm

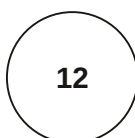

d = 16.1 mm

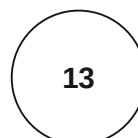

d = 16.5 mm

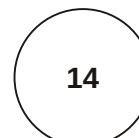

d = 16.9 mm

d = 17.3 mm

d = 17.7 mm

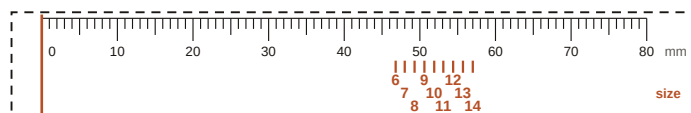

d = 18.1 mm

3 Or measure with a paper strip

Start: wrap from the 0 end

Cut along the dashed line

Circumference to size

Indian size	6	7	8	9	10	11	12	13	14
Circumference (mm)	46.8	48.0	49.3	50.6	51.9	53.1	54.4	55.7	57.0
Inside diameter (mm)	14.9	15.3	15.7	16.1	16.5	16.9	17.3	17.7	18.1

How to use

With the circles

- 1 Print at 100% and check the 50 mm line or the card box.
- 2 Lay a ring that fits the finger flat on the circles.
- 3 Your size is the circle that exactly fills the inside of the ring.
Between two sizes? Choose the larger.

With the paper strip

- 1 Cut out the strip along the dashed line.
- 2 Wrap it snugly around the base of your finger, starting from the 0 end, printed side out.
- 3 Mark where the 0 end meets the strip.
- 4 Read the size at the mark, or read the millimetres and find them in the table.

Measure at the end of the day, when fingers are slightly larger. Most Qilver rings are adjustable and need no size at all.
